

EEA Life Settlements Fund

Fact Sheet & Portfolio Update
31 December 2025

Important Information

This material is being issued by EPIC Investment Partners (Guernsey) Limited (which is licensed by the Guernsey Financial Services Commission to carry on the restricted activities of promotion, subscription, dealing, management, advising and administration in connection with Category 1 Collective Investment Schemes and Category 2 General Securities and Derivatives under the Protection of Investors (Bailiwick of Guernsey) Law, 1987 as amended).

EEA Life Settlements Fund PCC Limited (the “Fund” or “EEA Life Settlements Fund”) is an unregulated collective investment scheme as contemplated by the Financial Services and Markets Act 2000 and, accordingly, its promotion in the UK is restricted by law. It may be promoted by a UK authorised person in accordance with Section 238 of the UK Financial Services and Markets Act 2000 Act and/or the FCA Rules. Any person who is not an authorised person may not distribute it to any other person. This document may not be given to, or relied or acted upon by, any other person.

As at the date of this document, the Fund has not been approved, notified or registered in accordance with Article 42 of the EU Alternative Investment Fund Managers Directive (2011/61/EU) for marketing to professional investors in any member state of the European Economic Area. Such approval, notification or registration will not be made or sought in the future since the Fund is closed to further subscriptions and will not, therefore, be marketed to professional investors in the European Economic Area.

The Fund is closed to further subscriptions and neither this document nor the Fund’s Information Memorandum and Supplements (which, amongst other things, set out the risk factors associated with an investment in the Fund) constitute a direct or indirect offering or placement of shares or any other opportunity to invest in the Fund. Nothing contained in this note is to be construed as providing or offering investment, legal, accounting, tax or other advice and nothing should be relied on as such. The value of investments may go down as well as up and may be affected by changes in rates of exchange. Past performance should not be taken as an indication or guarantee of future performance and no representation or warranty, express or implied, is made regarding performance. Investments in the Fund do not provide capital guarantees like a deposit account and are not readily accessible. The rules on taxation can change and/or the tax treatment of the Fund could be challenged. Whilst all reasonable efforts have been made to ensure this document is accurate and up to date, no representations or warranties, either express or implied, are given as to the reliability, accuracy or completeness of the information contained in this note. Any opinions expressed are judgments at the time of writing and are subject to change without notice. To the extent permitted by law or regulation, no liability is accepted for any damage or loss, including without limitation loss of profit whether direct, indirect or consequential, in respect of the use of this material.

All data as at 31 December 2025 unless otherwise stated.

Fund Commentary

At the reporting date of 31 December 2025, the Fund held 19 life insurance policies with a total net death benefit of USD 66.8 million. The average policy size (net death benefit) was approximately USD 3.51 million. The portfolio covered 12 illnesses, 13 lives and 11 insurance companies. Based upon weighted net death benefit, 97% of the portfolio was represented by insureds who were aged 80 or over, with an overall weighted average age of 93.3 years.

Despite the age distribution, none of the policies have an expiry date set before 2027 or before their expected date of maturity. On a discretionary basis, a decision can still be made for a policy to lapse if keeping it active is expected to negatively impact the future performance of the Fund.

At the start of 2025, the Fund's independent valuation agent, Longevity Trading & Analytics (formerly Maple Life Analytics), projected portfolio maturities for the year of USD 10.8 million (with a range of between USD 0 and USD 35.3 million). In 2025, there was 1 reported maturity with a total net death benefit of USD 0.1 million.

Similar to last quarter, the portfolio NAV increased marginally over the last quarter while payment of insurance premiums amounted to approximately USD 2.6 million.

The effects of GBP/USD movements over the quarter were on average around -0.21%.

As a result, during the period the overall NAV per Share of the Cells decreased: GBP New Continuing Cell: -3.61% and GBP New Run-Off Cell: -4.48%.

A weighted average discount rate of 21.27% currently applies to the valuation of policies in the portfolio.

The discount rate refers to the rate used to determine the present value of the future cashflows anticipated in respect of each policy – it is a rate which reflects an implied annual return over the period from the date of valuation to the life expectancy estimate.
